ACKNOWLEDGEMENT

Purpose of acknowledgements page is to show appreciation to those who contributed in conducting this dissertation work / other tasks and duties related tothe report writing. Therefore when writing acknowledgements page you shouldcarefully consider everyone who helped during research process and show appreciation in the order of relevance. In this regard it is suitable to show appreciation in brief manner instead of using strong emotional phrases.

In this partof your work it is normal to use personal pronouns like "I, my, me" while in therest of the report this articulation is not recommended.Even when acknowledging family members and friends make sure of using thewording of a relatively formal register. The list of the persons you should acknowledged, includes guide (main and second), academic staff in your department, technical staff, reviewers, companies, family and friends.

You shouldacknowledge all sources of funding. It's usually specificnaming the person andthe type of help you received. For example, an advisor who helped you conceptualize the project, someone who helped with the actual building or proceduresused to complete the project, someone who helped with computer knowledge,someone who provided raw materials for the project, etc.

Abstract

Most difficult and important component of report/seminar is to write abstract. Presented at the beginning of the report, it is likely the first substantive descriptionof your work read by an external examiner/reader. You should view it as an opportunity to set accurate expectations. The abstract is a summary of the wholeproject work.

It presents all the major elements of your work in a highly condensedform. An abstract often functions, together with the project title, as a stand-alonetext. An abstract is not merely an introduction in the sense of a preface, preamble, or advance organizer that prepares the reader for the report.

In addition tothat function, it must be capable of substituting for the whole report when there is insufficient time and space for the full text.The final version of the abstract will need to be written after you have finishedreading your report for the last time. However, if you think about what it has tocontain, you realize that the abstract is really a summary of your project/seminar work.

Your abstract should answer specific questions: What was done? Why was it done?How was it done? What was found? What is the significance of the findings?
